Print Catalogue

Photo Prints & Enlargements

I use industry-leading, Canson PhotoSatin Premium — Archival Lustre Paper, a 270gsm semi-matte paper designed to comply with the highest lifespan requirements. Photo Prints and enlargements are available in a wide range of sizes — see the price list at the back of this catalogue.

Posters

Print posters are available in three sizes, with A2 (Small), A1 (Medium) or A0 (Large) print areas. Posters are printed with a 5mm white border. They're printed on durable 180gsm matte stock.

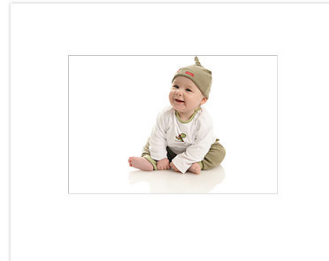

Greeting Cards

Greeting Cards are printed on Durst Theta superior photo paper, bonded to high quality 200 gsm card for the best internal writing surface, creased and packed with an envelope. The card size is C6 folded (114mm x 162mm / 4.5" x 6.4").

Michael Fotheringham Portraits

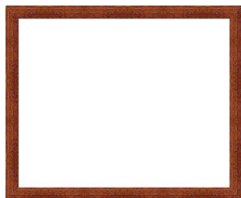

Matted Prints

A high quality photographic print between two layers of matte board cut to a standard 508mm x 406mm (20" x 16") size. The result is a beautifully simple and interchangeable work of art which can be placed inside a reusable picture frame (also available) or mounted to the wall directly.

Image: 326mm x 218mm (12.8" x 8.6")
Matting: 508mm x 406mm (20" x 16")

You can also purchase a gorgeous solid timber frame designed especially to suit matted prints, allowing you to display lots of different artwork in the one frame over time. They're available in a range of colours for \$100.

Canvas Prints

My Canvas Prints are printed on Canson Canvas, using an Epson printer and Epson pigment inks to ensure a quality product that will look great and last forever. All canvas prints have a water-based clear lacquer applied to them as a UV barrier and to protect the canvas prints from scuffing. All canvas prints are mounted on Eucalyptus Regnans hardwood for a sturdy frame.

Michael Fotheringham Portraits

Acrylic Ice Prints

This cost effective, modern and stylish mounting system is different to stretched canvas in that it sandwiches a printed image (on either canvas or paper) between two sheets of acrylic. Acrylic Ice uses very high quality laser cut 4.5mm ultra clear acrylic sheets in front and a 3mm frosted back panel. Larger units use 4.5m back panels for rigidity.

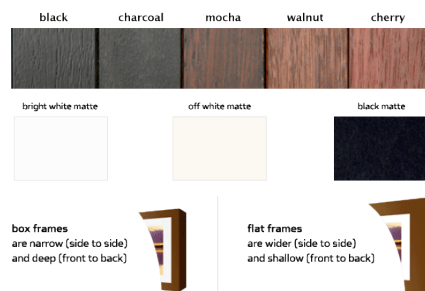

Acrylic Ice features a standoff system that gives a 2.5cm (1") separation from the wall. With European styled stainless steel or Anodised Aluminium finishes.

Your image can be printed so that it goes right to the edge of the panel or with a 6cm border on all 4 sides as shown in the pricing sample images above. With a border, the frosted back sheet of acrylic creates a diffuse border the in whatever colour the wall is.

Framed Prints

Finely-crafted custom frames create stunning prints. Frames are crafted from quality timbers in a range of finishes. A white, off-white or black matte surrounds the print to emphasize the artist's work and bring the piece to life. Premium ultra-clear perspex in front provides a superior finish and means the piece is lighter and easier for you to move without breaking. Frames are available in a range of colours, and two styles.

box frames
are narrow (side to side)
and deep (front to back)

flat frames
are wider (side to side)
and shallow (front to back)
